Capabilities Statement

Orion has vast experience across multiple federal agencies and state and local public sector projects. These projects have included interior and exterior lighting, emergency and egress lighting, occupancy/vacancy sensors, control adaptations, and daylight harvesting. We are executing some of the largest EV Charging installations in the USA. Orion also has some experience in water-saving execution and small HVAC controls.

Orion Energy System can provide a one-shop stop for conversion to highly efficient LED lighting and controls for indoor and outdoor facilities and applications. Full turnkey services are Orion specialty managing large-scale multi-site projects. Our projects include USACE, US Army, NAVFAC, USAF, University of North Florida, Duval County Schools, Veteran’s Administration Hospitals, and GSA Boston. US Postal Services and Homeland Security. Extensive Commercial Clients as well to name a few.

Orion Energy Systems is laser-focused on delivering superior LED lighting solutions that reduce energy consumption – which translates to major cost savings for our customers and reduced emissions for the environment.

Core Competencies
